

 ELITE

About Us

We deliver innovative tech solutions and hotel services that enhance guest experiences and improve hotel operations. As an authorized distributor of a global brand, our expert team combines IT and hospitality to offer smart automation and tailored management services, supporting your success at every step.

Our Services

CCTV System

network of cameras that record and monitor activities in various locations, enhancing security by providing real-time surveillance and evidence for safety purposes.

Access Control

security technique that regulates who or what can view or use resources in a computing environment, ensuring only authorized access through authorization methods.

Fire Fighting

practice of controlling and extinguishing fires to protect lives, property, and the environment, using specialized equipment and trained personnel to respond effectively.

Structured Cabling

standardized system of cables and infrastructure that supports data, voice, and video networks, ensuring efficient and organized connectivity within buildings.

Our Services

Solar Energy System

converts sunlight into electricity, stores excess power in batteries, and uses inverters to convert DC to AC for home, C&I use.

Smart Systems

advanced technology that uses sensors, automation, and connectivity to enhance efficiency, control, and convenience in homes, offices, and industries.

AV & Conference System

integrates audio-visual equipment and communication tools, enabling seamless video conferencing, presentations, and collaboration in professional settings.

Parking System

automated solution that manages vehicle parking, optimizing space usage, ensuring security, and providing guidance through sensors and payment systems.

Our Products

Smart System

Room Safes

Hotel room safes are small, secure units installed inside guest rooms to provide temporary storage for valuables such as jewelry, electronics, and important documents.

Power Saver System

Reduce energy costs and promote sustainability. Designed for hotel rooms, it automatically controls electricity usage by detecting guest presence through key card activation or motion sensors. Ideal for lighting, air conditioning, and appliances, this solution helps optimize energy efficiency without compromising guest comfort.

Our Products

Smart System

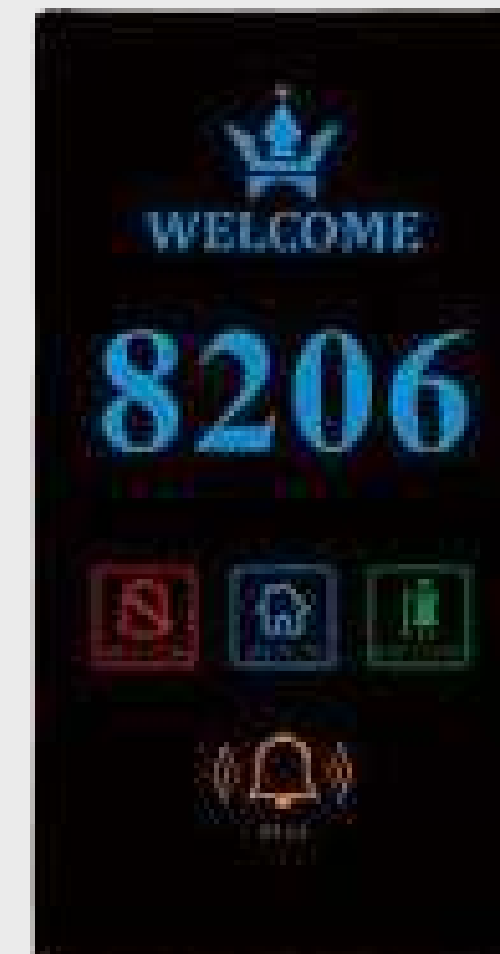

Time Keeping

Access Control

Intercom

Door Sign

Hotel room door signs are a small yet important aspect that enhances the guest experience. They facilitate smooth navigation, provide control over privacy and service, and subtly represent the hotel's brand and hospitality.

Our Products

Smart System

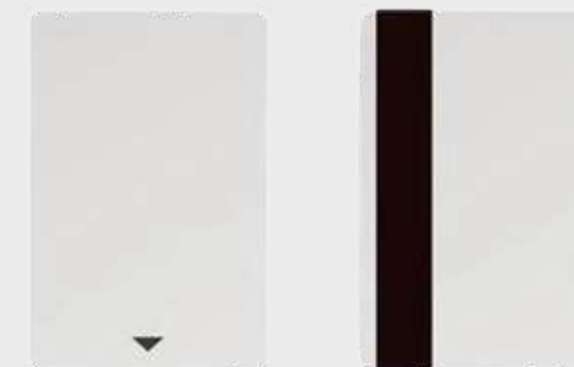

Smart cards

Our Smart Cards work with hotel power saver systems to reduce energy consumption by controlling room electricity based on guest presence. When inserted into a wall-mounted unit, they activate power in the room and removing them automatically shuts off non-essential systems like lights and air conditioning. Various types are available to meet client needs.

Our Products

Compact Comfort Essentials

Hair Dryer

Provide comfort and convenience with our Compact Hotel Hair Dryer, designed specifically for guest use. Featuring a sleek, wall-mounted design, multiple heat and speed settings, and built-in safety features, it's perfect for modern hotel bathrooms. Durable, easy to maintain, and space-saving, this is a must-have amenity for enhancing your in-room experience.

Solid Door

Glass Door

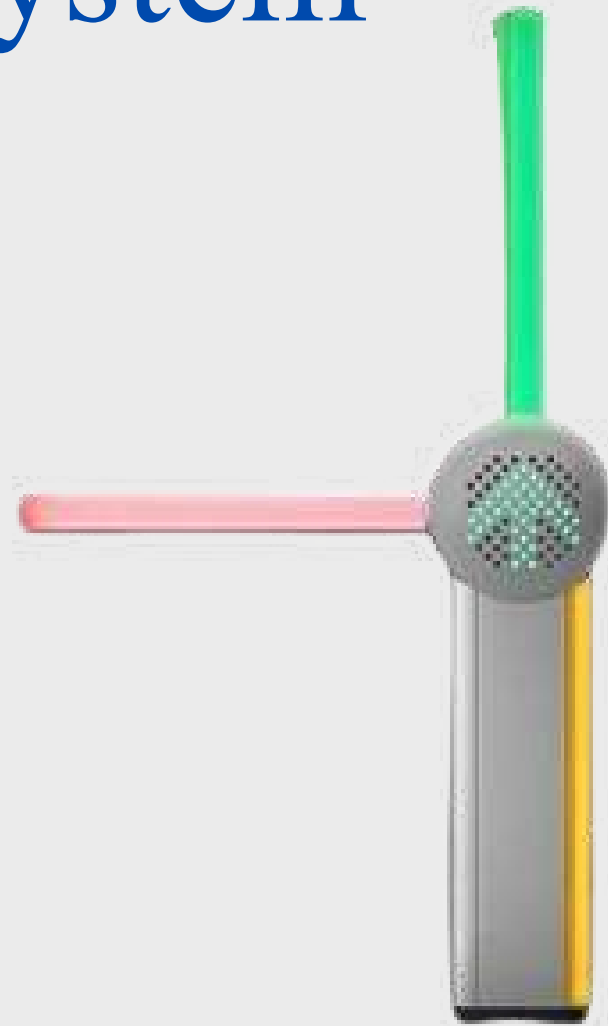

Mini Bar

Enhance guest satisfaction with our sleek, energy-efficient Premium In-Room thermos Mini Bar . offers quiet operation, adjustable shelving, and customizable product layouts. Stock it with beverages, snacks, or specialty items to create a personalized and convenient in-room experience. A perfect blend of style and functionality for today's hospitality standards.

Our Products

Parking System

The planning, monitoring, and control of vehicle parking spaces to ensure efficient use and reduce congestion. It often uses technology like sensors, ticketing systems, and apps to streamline operations and enhance user experience.

X-Ray Screening

It is a security process that uses X-ray technology to inspect the contents of bags, luggage, or cargo without opening them. It helps detect prohibited or dangerous items such as weapons, explosives, and contraband.

Our Products

Garage Smart Gage

Intelligent system monitoring vehicle parking, optimizing space usage, and enhancing safety with real-time data and automation features.

Shutter

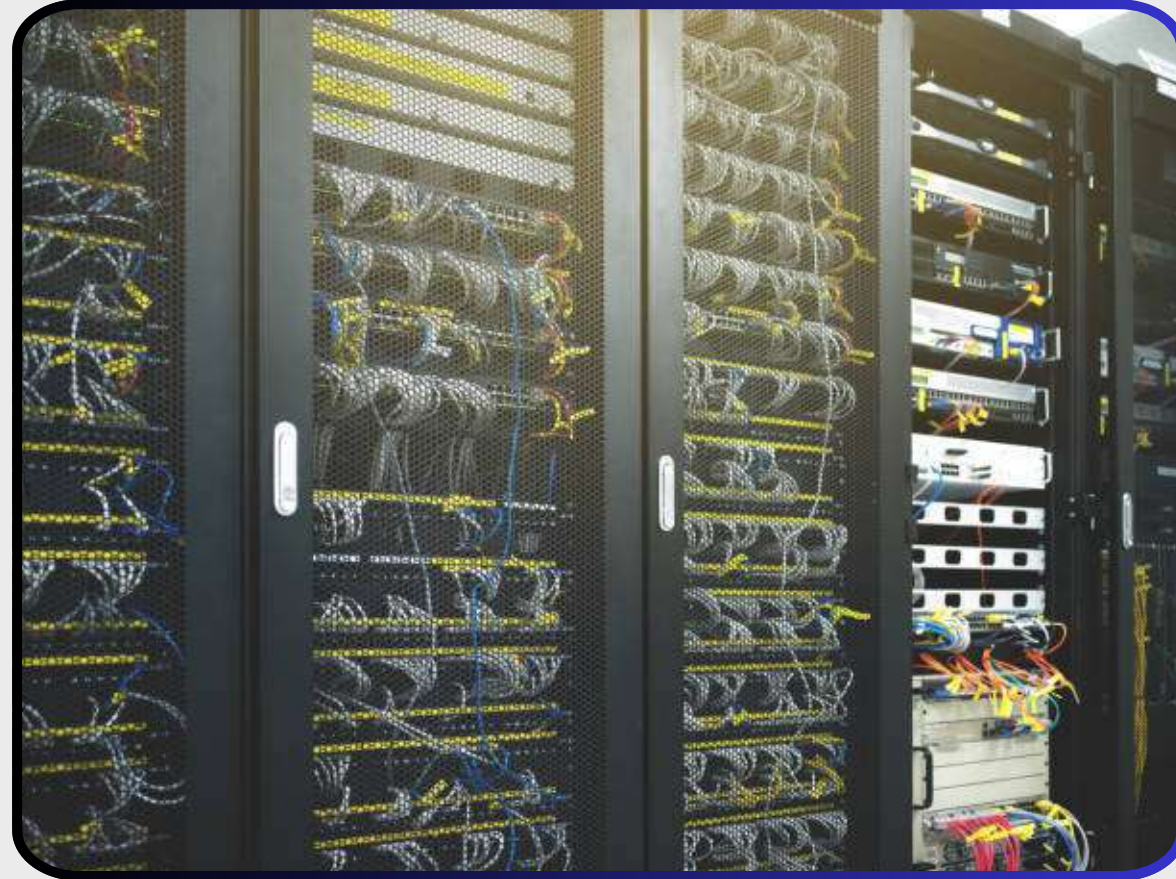

An automated solution for controlling window or door shutters, enhancing security, privacy, and energy efficiency with smart, remote operation features.

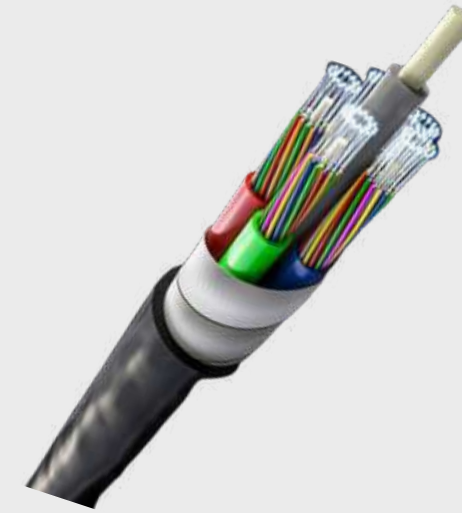

Our Products

Structured Cabling

A structured cabling system is a standardized network infrastructure that organizes and integrates cabling for data, voice, and video, ensuring reliable, scalable, and efficient connectivity.
